

Dr. Techy says,

"The natural job of neurohormones is to promote neurogenesis."

DECEMBER, 2014
BULLETIN 31

BASICS OF HORMONE TESTING AND TREATMENT

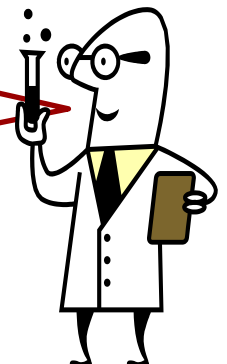

ACTION

- ✓ 1 Obtain a hormone profile.
- ✓ 2 Replace any deficient hormones.
- ✓ 3 Determine if patient has centralized pain (central sensitization).
- ✓ 4 If central pain is present, strongly consider a neurohormone: human chorionic gonadotropin (HCG), oxytocin, progesterone.

Dr. Hormone says,

"A patient with a central pain syndrome will likely have hormone deficiencies and a need for neurohormone treatment."
